## UNABLE TO FIND DOCTOR TO ATTEND KING GEORGE

Corp. Fred Clark Describes Futile Gallop After English Monarch Was Injured in France.

LONDON, November 5.—A letter from Corp. Fred Clark of the military mounted police in France describes his futile gallop for two miles when King George was injured by a fall from his horse in France last week. He says: "The horse started kicking as the king lay on the ground, but several of the staff officers ran and picked the king up. They then laid him down again a little distance away. One of them ran up to me and said, breathlessly: 'Go find a doctor. Ride like hell.' 'I went on a straight gallop for two miles but could not find a doctor any-

where. They were with their regiments. So I returned and reported I could not find one. Then they picked the king up again and carried him to his automobile. He had been lying on the ground about ten minutes, evidently rather seriously injured. I happened to be the only mounted man there except the king's escort."

King George is recovering slowly from the effects of the fall from his horse. The following official bulletin was issued today:

"The king had a somewhat better night. His appetite is improving but he still has some pain, especially on attempting any movement."

### Plans for Canal Land Defenses.

Tolbert, the lowest bidders, for the complete clearing of land, aggregating 3,414 acres, and sixty-eight miles of twenty-foot trail, connected with the land defenses of the canal and railroad. The work is to be done at a cost of \$24,157.

## REV. JAMES NOONAN DIES AT AGE OF SEVENTY-FOUR

Catholic Divine for Years Identified With Aloysius Parish in This City.

Rev. James Noonan, seventy-four years old, for many years connected with St. Aloysius parish, where his record in the ministry for baptismal ceremonies, marriages and attendance on the sick is said to have exceeded that of any priest in Washington, died yesterday at Georgetown University Hospital, following a lingering illness. Death was due to complication of diseases.

The body was taken to the rectory of St. Aloysius this afternoon, and after services this evening the body will lie in state in the church until after the mass at 9 o'clock tomorrow morning. The mass is to be celebrated by Rev. Joseph Hanselman, president of Woodstock College. Interment is to be in the Georgetown College cemetery.

### Native of Ireland.

Rev. James Noonan, S. J., was born in Cork, Ireland, in 1841, and came to this country in 1873, at the request of Cardinal Vaughan, to establish a house in Baltimore of the order of Josephites, which the cardinal had just founded in London for the care of colored people. In 1877 Father Noonan entered the Society of Jesus at Frederick, Md., where he remained two years. He was intrusted with many duties of great responsibility, notably at Providence, R. I., where he was rector of St. Joseph's Church, and at Kingston, Jamaica, where he had charge of all the missions.

### Record of His Lifework.

His lifework, however, was done in St. Aloysius parish, in this city, friends point out, declaring that his record in the ministry for baptisms, marriages and in sick cases has exceeded that of any priest in Washington. In consequence he was greatly beloved, especially by the poor, to whom he was a friend and helper.

His large acquaintance with prominent men, lay and ecclesiastical, was the more remarkable as he was well known as a man of very modest and retiring disposition.

### TO TALK FROM DESK HERE WITH AID AT NEW YORK

Secretary Daniels to Test Publicly the Success of Wireless Transmission of Voice.

Secretary Daniels will demonstrate publicly the success of recent experiments with radio transmission of the human voice this afternoon, when he will talk from his desk in the Navy Department with Rear Admiral Usher, commandant at the New York navy yard, by wireless telephone. A telephone wire will convey the message to the government's high-power station at Arlington, Va., whence it will be automatically sent out in radio impulses, which will be received by the wireless tower at the New York yard, automatically transmitted to the regular telephone system in the yard, and thence to Admiral Usher's desk phone in his office there.

Admiral Usher's reply will come by long-distance telephone, as only one wireless telephone-sending instrument has been constructed as yet.

There will be seven receiving sets at either end of the conversation, however, so that messages in both directions will be heard by newspaper men who have been invited to be present during the test.

### Great Possibilities Foreseen.

Secretary Daniels foresees that the day is not far distant when he will be able to talk directly from his office with the commander-in-chief of the Atlantic fleet on his flagship, wherever the ship may be, in port or at sea.

It is possible also that he will be able to converse with the admiral in command of the Pacific fleet or even with the flagship of the Asiatic squadron in Chinese waters by relaying his messages automatically through the great radio stations the Navy Department is establishing throughout the United States and its island possessions.

### SAY HE STOLE TEAM.

Edward Carter of Philadelphia Charged With Grand Larceny.

Charged with grand larceny Edward Carter, twenty-three years old, said to be a resident of Philadelphia, is to be given a hearing in the Police Court Tuesday.

Carter is alleged to have stolen a horse and buggy belonging to Harry Schlegel, proprietor of a livery stable at 327 D street northwest. He was arrested by Harry Schlegel, Jr., who followed him to a point near Baltimore, it is stated, and brought him back to this city. He was turned over to Detectives Vermillion and Messner, who had been assigned to investigate the disappearance of the team.

Carter was taken to court today, but the case was continued because of the absence of a witness.

### Rises to Height of 11,000 Feet.

PENSACOLA, Fla., November 5.—Lieut. Richard C. Sauley, using a hydro-aeroplane, yesterday rose to a height of 11,000 feet, according to an official announcement at the Navy Aviation School here tonight. The height reached was said here to be a navy record for that type of machine. Lieut.
